This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

INTRODUCTION.

The percentage Tables in this volume have been prepared in the belief that they will be found very useful to business men everywhere.

TABLE 1.—This Table shows the Interest upon One Dollar for one hundred days at the several rates per cent.; the interest being calculated to *five* places of decimals. By means of this Table, interest may be computed very easily, the rule being to take from the Table the interest upon One Dollar for the given time and multiply it by the number or dollars upon which you wish to know the interest.

Example.—What is the interest upon $200 for 91 days at 8 per cent.? Take from the Table the interest upon One Dollar for the time, which is 02022
Multiply the interest by 200

Answer, ... $4.04400

TABLE II.—This is the general Interest Table from which interest upon any sum is directly taken. At the top of each page is the number of Dollars upon which the interest is computed, as shown upon the page. The Time column, showing the years, months and days, in their natural order, is in the centre of each page, and the common rates of interest, 7 and 10 per cent., arranged on either side of it, with interest at other rates arranged in parallel vertical columns.

Example.—What is the interest upon $500, for one year, four months and seventeen days, at 8 per cent.?

Turn to page 111, which gives the interest for one year, as , ... $40.00
Add for four months, as 13.33
Add for seventeen days, as 1.89

Answer, ... $55.22

Digitized by Google

To get the interest for cents, take from the Table as for dollars, simply pointing off two more places of decimals in the result, the interest for a given number of cents being just one-hundredth part of the interest for a like number of dollars.

TABLE III.—The use of the Compound Interest Table, on page 7 is as follows: The first left hand column shows the years from 1 to 20, and the horizontal lines to the right show the *amount* of $1, or £1, at compound interest, at the rates shown in the top line. These amounts are carried to six places of decimals. The rule is to take from the Table the amount of one dollar for the time and rate, and multiply it by the number of dollars.

Example.—What is the amount of $500, at compound interest, for thirteen years, at 4½ per cent.?

The amount of one dollar for the time as shown in the table, is $1.772196

Multiply by the number of dollars, ... 500

Which gives as the amount required, . . . $886.098000
